---

TJ and Derek, please let me know if this is not correct, in response to Bob's question:

With the new USDA numbers, the cost goes up to \$75 million annually (3% discount rate).

Benefits: "Across all diseases, the reduction is about 53 cases annually. The estimated farmworker cases are 0.75% of the annual cases for the United States, and the break-even cases are the number of cases that are prevented."

Let's try for Monday am. Bill and I have a jim jones meeting at 3-4 on Monday.

On the #s, can you give me the cost change from before to now with adding the establishments in? From \$50m to \$75M?? And what is the # of incidents avoided going up to? From 35 to 57???

The chief of staff for the OSHA Secretary has offered the choice of 10 to 12, or 3 to 4 on Monday, May 17 for a briefing. The 10 to 12 time works for me. Kathy is not available on the 17th. I have to check with Michelle. Her schedule has her out on the 17th. We'll have it sorted by tomorrow a.m. We have a short list of other DoL folks that ought to be at the briefing

Bob,

The WPS revisions to the EA are moving along. We plan to provide comments tomorrow to BEAD on

Chapter 6 that we got about a week ago, then all that's left is the Executive Summary, which TJ is updating (and he wants us to review it as well).

TJ and Michelle will work through the preamble to insert the revised costs. There may be some language that needs to change (depending on the cost changes and the benefits). Hopefully that can get done this week - but I know Michelle is in a CTAG meeting part of this week, so early next week may be more likely.

It would be good to get a staff review of the preamble after that - as edits are made, errors can creep in. Then, management should review the package, right? It looks good (unless something big comes up) for the package to be revised and ready to go to RCS by the end of this month.

I believe Kevin is handling the OSHA briefing schedule.

Can you give me an update on both points?
